Pankaj Vadgama
Manchester, UK

Max E. Valentinuzzi
Tucuman, Argentina

Peter S. Walker
Stanmore, UK

David F. Williams
Liverpool, UK

Alan L. Yettram
Uxbridge, UK

Medical Engineering & Physics provides a forum for the publication of the latest developments in biomedical engineering, and reflects the essential multidisciplinary nature of the subject. The Journal publishes in-depth critical reviews, scientific papers and communications of work which is at an earlier stage of development. Topics covered include clinical engineering, biomedical computing, biological systems, instrumentation, medical imaging technology, biomaterials, biomechanics and rehabilitation. *Medical Engineering & Physics* keeps both medical engineers and clinicians abreast of the latest applications of technology to health care.

Author Service Department: For queries relating to the general submission of articles (including electronic text and artwork) and the status of accepted manuscripts, please contact the Author Service Department: e-mail: authors@elsevier.co.uk; Fax: +44 (0) 1865 843905; Tel.: +44 (0) 1865 843900.

Publishing Offices: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. Tel: +44 (0)1865 843000; fax: +44 (0)1865 843010.

Production Office: Elsevier Science Ltd, Bampfylde Street, Exeter EX1 2AH, UK. Tel: +44 (0)1392 251558, Fax: +44 (0)1392 425370.

Advertising Office: Mark Butler, MTB Advertising, 11 Harts Gardens, Guildford GU2 6QA, UK. Tel: +44 (0)1483 578507; fax: +44 (0)1483 572678.

Frequency: *Medical Engineering & Physics* is an international journal published in January, March, April, June, July, September, October and December by Elsevier Science Ltd.

Subscription Information: Annual Institutional Subscription Rates 1999: Europe, The CIS and Japan 2135.00 Dutch Guilders. All other countries US$1084.00. Associated Personal Subscription rates are available on request for those whose institutions are library subscribers. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Any enquiry relating to subscriptions should be sent to: **The Americas**: Elsevier Science, Customer Support Department, PO Box 945, New York, NY 10010, USA [Tel: (+1) 212 633 3730/1 888 4ES-INFO; fax: (+1) 212 633 3680; e-mail: usinfo-f@elsevier. com]. **Japan**: Elsevier Science Customer Support Department, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan [Tel: (+81) 35561 5033; fax: (+81) 35561 5047; e-mail: info@elsevier.co.jp]. **Asia Pacific (excluding Japan)**: Elsevier Science (Singapore) Pte Ltd, No. 1 Temasek Avenue, 17-01 Millenia Tower, Singapore 039192. [Tel: (+65) 434-3727; fax: (+65) 337 2230; e-mail: asiainfo@elsevier.com.sg]. **Rest of the World**: Elsevier Science Customer Service Department, PO Box 211, 1001 AE Amsterdam, The Netherlands. [Tel: (+31) 20 485 3757; fax: (+31) 20 485 3432; e-mail: nlinfo-f@elsevier.nl].

Back Issues: Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1992–1997. Earlier issues are available in high quality photo-duplicated copies as complete columns only.

Periodicals postage paid at Rahway, NJ and additional entry points. *Medical Engineering & Physics* (ISSN 1350-4533) is published in 10 issues by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. The annual subscription in the USA is $1084.00. *Medical Engineering & Physics* is distributed by Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001. Postmaster: please send address corrections to *Medical Engineering & Physics*, c/o Elsevier Science RSO, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, USA.

Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the IPEM. The transfer will ensure the widest possible dissemination of information. This journal and the individual contributions contained in it will be protected by the copyright of the IPEM and the following terms and conditions will apply to their use: **Photocopying**. Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use. In the USA, users may clear permissions and make payment through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. In the UK, users may clear permissions and make payment through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 9HE, UK. In other countries where a local copyright clearance centre exists, please contact it for information on required permissions and payments. **Derivative Works**. Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for all other derivative works, including complications and translations. **Electronic Storage**. Permission of the publisher is required to store electronically any material contained in this journal, including any article or part of an article. Contact the publisher at the address indicated. Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher. No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Item-fee code for this publication is:
1350-4533/98 $19.00+0.00.

Medical Engineering & Physics is indexed/ abstracted in BECI; BIOSIS; Chemical Abstracts; Current Contents; Elsevier BIOBASE/Current Awareness in Biological Sciences; EMBASE/Excerpta Medica Index Medicus and INSPEC.

Medical Engineering & Physics

Volume 19 (1997)

Volume 19 Number 1 January 1997

Papers

1 Development and evaluation of an inexpensive sensor system for use in measuring relative finger positions
J. Jurgens, P. E. Patterson

7 An instrument for the non-invasive objective assessment of velar function during speech
C. C. Mclean, S. W. Kelly, M. Christopher, G. Manley

15 Parallel principal component neural networks for classification of event-related potential waveforms
J. R. Sveinsson, J. A. Benediktsson, S. B. Stefansson, K. Davidsson

21 Two artificial neural systems for generation of gait swing by means of neuromuscular electrical stimulation
F. Sepulveda, M. H. Granat, A. Cliquet Jr

29 Analytical study on the kinematic and dynamic behaviors of a knee joint
Z.-K. Ling, H. Q. Guo, S. Boersma

37 Force, velocity and energy dynamics of nine load-moving muscles
R. V. Baratta, M. Solomonow, R. Best, R. D'Ambrosia

50 Comparison between two techniques for modeling interface conditions in porous coated hip endoprosthesis
M. S. Hefzy, S. P. Singh

63 Reproducibility of techniques using Archimedes' principle in measuring cancellous bone volume
L. Zou, R. D. Bloebaum, K. N. Bauchus

69 Estimation of parameters in a two-pool urea kinetic model for hemodialysis
M. Burgelman, R. Vanholder, H. Fostier, S. Ringoir

77 Automatic location of vertebrae in digitized videofluoroscopic images of the lumbar spine
J. M. Muggleton, R. Allen

90 Preliminary experience with medical applications of rapid prototyping by selective laser sintering
E. Berry, J. M. Brown, M. Connell, C. M. Craven, N. D. Efford, A. Radjenovic, M. A. Smith

97 Stress and strain distribution within the intact femur: compression or bending?
J. P. Paul

Authors response

99 *M. Taylor, K. E. Tanner, M. A. R. Freeman, A. L. Yettram*

Volume 19 Number 2 March 1997

Papers

101 An *in vitro* study on the effect of branch points on the stability of coronary artery flow
J. Peacock, T. Jones, C. Tock, R. Lutz

109 A multivariate time-variant AR method for the analysis of heart rate and arterial blood pressure
V. Di Virgilio, R. Barbieri, L. Mainardi, S. Strano, S. Cerutti

125 A new method for assessment of changes in retinal blood flow
E. T. Lee, P. G. Rehkopf, J. W. Warnicki, T. Friberg, D. N. Finegold, E. G. Cape

131 Time-dependent stress and displacement of the eye wall tissue of the human eye
T. David, S. Smye, T. James, T. Dabbs

1350-4533/99/$19.00 © 1999 IPEM. Published by Elsevier Science Ltd. All rights reserved.

140 Spatial resolution in plantar pressure measurement
M. Lord
145 Biomechanics of load-bearing of the intervertebral disc: an experimental and finite element model
J. B. Martinez, V. O. A. Oloyede, N. D. Broom
157 Liquid ventilation: a mathematical model of gas diffusion in the premature lung
M. L. Costantino, G. B. Fiore
164 A dual coordinate system finite difference method for forward and inverse solutions of the volume conductor problem in neurology
S. Ouyang, D. E. Maynard
171 A scoliosis correction device based on memory metal
A. G. Veldhuizen, M. M. Sanders, J. C. Cool
180 Comparison of predicted and measured contact pressures in normal and dysplastic hips
D. A. Michaeli, S. B. Murphy, J. A. Hipp

Technical Note

187 Design and evaluation of a device for measuring three-dimensional micromotions of press-fit femoral stem prostheses
D. W. Bühler, T. R. Oxland, L.-P. Nolte

Book Review

200 Estimation of blood velocities using ultrasound: a signal processing approach
C. Deane

Volume 19 Number 3 April 1997

Papers

201 Identification and physiological relevance of an exponentially tapered tube-model of canine descending aortic circulation
R. Fogliardi, R. Burattini, K. B. Campbell
212 Comparison of different methods for the determination of the true wave propagation coefficient, in rubber tubes, the canine thoracic aorta
C. D. Bertram, B. S. Gow, S. E. Greenwald
223 A mathematical model of the circulation in the presence of the bidirectional cavopulmonary anastomosis in children with a univentricular heart
G. Pennati, F. Migliavacca, G. Dubini, R. Pietrabissa, M. R. de Leval
235 Three-dimensional study of the effect of two leaflet opening angles on the time-dependent flow through a bileaflet mechanical heart valve
M. J. King, T. David, J. Fisher
242 An investigation of the stress distribution generated in articular cartilage by crystal aggregates of varying material properties
A. Hayes, S. E. Clift, A. W. Miles
253 Producing physiologically realistic individual muscle force estimations by imposing constraints when using optimization techniques
J. H. Challis
262 Thermographic strain analysis of the proximal canine femur
S. S. Kohles, R. Vanderby
267 A high-speed gated baseline restorer and its implementation in a blood cell volume analyser
E. W. Abel, S. Inglis, Y. Liu, J. J. F. Belch, A. Koop
273 Clinical assessment of the low-cost VariCom isokinetic knee exerciser
D. Greenblatt, W. Diesel, T. D. Noakes
279 A comparison of ECG cancellation techniques applied to the surface recording of somatosensory evoked potentials
J. S. Black, D. F. Lovely
286 A data-logging system to monitor bone fracture movement
C. I. Moorcroft, P. J. Ogrodnik, P. B. M. Thomas, S. Verborg, G. T. Gunning

291 Detection of cardiac late potentials in nonstationary noise
R. Atarius, L. Sörnmo

Technical Note

299 Ag/AgCl/Cl^- coated silver-stripe reference electrode
F. Yalcinkaya, E. T. Powner

Volume 19 Number 4 June 1997

Papers

303 *In-situ* simulation of one-piece metacarpophalangeal joint implants using finite element analysis
J. M. T. Penrose, N. W. Williams, D. R. Hose, E. A. Trowbridge
308 Human body model response to mechanical impulse
M. Jarrah, W. Qassem, M. Othman, M. Gdeisat
317 Simultaneous monitoring of head-to-cervic forces, intrauterine pressure and cervical dilation during labour
M. C. Antonucci, M. C. Pitman, T. Eid, P. J. Steer, E. S. Genevier
327 Mathematical modelling of the human foetal cardiovascular system based on Doppler ultrasound data
G. Pennati, M. Bellotti, R. Fumero
336 Tissue characterization from X-ray images
L. Bocchi, G. Coppini, R. De Dominicis, G. Valli
343 On the abdominal aortic aneurysms: pulsatile state considerations
N. Viswanath, C. M. Rodkiewicz, S. Zajac
352 Pattern analysis of temporal changes in the carotid artery diameter under normal and pathological conditions
A. Blizhevsky, H. Azhari, D. Gaitini, U. Dinnar
359 A new method for the calibration of peak flow meters
J. A. Bushman, J. R. Calvert, J. Stockwell

Technical Notes

367 Spatial reconstruction of marker trajectories from high-speed video image sequences
A. Baca
375 Improvement of resolution in measurement of electrocardiogram RR intervals by interpolation
I. Daskalov, I. Christov
380 Power spectra accuracy improvement by optimal signal epoch selection: an heuristic approach
I. P. Mitov, I. K. Daskalov

Communications

387 Low frequency distortions of the electrocardiogram
I. Daskalov, I. Christov, I. Dotsinsky
394 Computational transient simulations with varying degree and shape of pulmonic stenosis in models of the bidirectional cavopulmonary anastomosis
F. Migliavacca, G. Dubini, R. Pietrabissa, M. R. de Leval

I Erratum

Volume 19 Number 5 July 1997

Papers

405 A method of examining the magnitude and origin of "soft" and "hard" tissue forces resisting limb lengthening
T. N. Gardner, M. Evans, A. H. R. W. Simpson, P. J. Kyberd, J. Kenwright
412 Methodology and apparatus to determine material properties of the knee joint meniscus
D. J. Goertzen, D. R. Budney, J. G. Cinats

420 Spatio-temporal representation of multichannel EMG firing patterns and its clinical applications
J.-J. J. Chen, T.-Y. Sun, T.-H. Lin, T.-S. Lin
431 Mechanical simulation of composite hip stems
C. Kaddick, S. Stur, E. Hipp
440 Ambulatory monitoring of children's activity
H. J. Busser, J. Ott, R. C. van Lummel, M. Uiterwaal, R. Blank
446 An experimental study of the failure modes of the Gamma Locking Nail and AO Dynamic Hip Screw under static loading: a cadaveric study
R. C. Haynes, R. G. Pöll, A. W. Miles, R. B. Weston
454 Computer prediction of adapative bone remodelling around noncemented femoral prostheses: the relationship between damage-based and strain-based algorithms
B. P. McNamara, D. Taylor, P. J. Prendergast
464 The effects of density and test conditions on measured compression and shear strength of cancellous bone from the lumbar vertebrae of ewes
D. Mitton, C. Rumelhart, D. Hans, P. J. Meunier
475 Determination of transients and compensation capacities of breath-by-breath analysis by cubic splines
M. Golitschek, F. W. Schardt

Technical Notes

481 Nonlinear high pass filter for R-wave detection in ECG signal
L. Keselbrener, M. Keselbrener, S. Akselrod
485 Power spectra accuracy improvement by a method for leakage effect reduction
I. P. Mitov

Communication

495 Application of the design of experiments for the evaluation of the robustness of video-densitometric measurements
A. L. Audenino, E. M. Zanetti, P. M. Calderale

Volume 19 Number 6 September 1997

Papers

501 A signal processing technique to determin respiratory function parameters in infants using inductive plethysmography
R. D. Selbie, M. Fletcher, N. Arestis, R. White, A. Duncan, P. Helms, P. Duffty
512 Estimating the effective Young's modulus of soft tissues from indentation tests — nonlinear finite element analysis of effects of friction and large deformation
M. Zhang, Y. P. Zheng, A. F. T. Mak
518 A stiffness-varying model of human gait
X. H. Duan, R. H. Allen, J. Q. Sun
525 Apparatus and methods for studying artificial feedback-control of the plantarflexors in paraplegics without interference from the brain
N. Donaldson, M. Munih, G. F. Phillips, T. A. Perkins
536 Modelling and simulation of the hand grasping using neural networks
Z. Taha, R. Brown, D. Wright
539 Comparison of loads on internal spinal fixation devices measured *in vitro* and *in vivo*
A. Rohlmann, G. Bergmann, F. Graichen, U. Weber
547 A model study of periodic breathing, stability of the neonatal respiratory system, and causes of sudden infant death syndrome
F. T. Tehrani
556 Predicting the leakage performance of small bodyworn disposable incontinence pads using laboratory tests
A. M. Cottenden, G. E. Dean, R. J. Brooks
572 Data compression of fetal Doppler ultrasound audio signals using zero-crossings analysis
J. Taylor, C. J. Paull, B. R. Hayes-Gill, J. A. Crowe

Technical Notes

581 Time-frequency distribution of heart rate variability below 0.05 Hz by Wigner–Ville spectral analysis in congestive heart failure patients
H-L. Chan, J-L. Lin, C-C. Du, C-P. Wu
588 Three-dimensional stress analysis of polypropylene leaflets for prosthetic heart valves
M. A. Thornton, I. C. Howard, E. A. Patterson

Volume 19 Number 7 October 1997

Editorial

iii *Colin Roberts*

Papers

599 Development of a cancellous bone structural model by stereolithography for ultrasound characterisation of the calcaneus
C. M. Langton, M. A. Whitehead, D. K. Langton, G. Langley
605 Iterative function system and genetic algorithm-based EEG compression
S. K. Mitra, S. N. Sarbadhikari
618 Noninvasive measurements of cardiac output in sheep: an improved thermometry method
V. B. Serikov, E. H. Jerome
630 The optical properties of the cochlear bone
A. O. Ugnell, P. Å. Öberg
637 Hyper-elastic model analysis of anterior cruciate ligament
S. Hirokawa, R. Tsuruno
652 The shear behaviour of the rabbit medial collateral ligament
A. Wilson, F. Shelton, C. Chaput, C. Frank, D. Butler, N. Shrive
658 Performance characteristics of combined haemodialysis/haemoperfusion system for removal of blood toxins
C. J. Lee, H. W. Hsu, Y. L. Chang
668 Stresses from flexure in composite helical implantable leads
J. M. Meagher, P. Altman

Communication

675 Long-term survival of experimental calves with a left ventricular assist impeller pump
K. X. Qian, M. Zheng

Volume 19 Number 8 December 1997

Papers

681 Program for generation of three-dimensional finite element mesh from magnetic resonance imaging scans of human limbs
S. Aritan, P. Dabnichki, R. Bartlett
690 The design and performance of an experimental external fixator with variable axial stiffness and a compressive force transducer
E. R. C. Draper, R. K. Strachan, S. P. F. Hughes, A. C. Nicol, J. P. Paul
696 Assessment of the influence of the compliant aortic root on aortic valve mechanics by means of a geometrical model
A. Redaelli, E. Di Martino, A. Gamba, A. M. Procopio, R. Fumero
711 The effect of surface topography of retrieved femoral heads on the wear of UHMWPE sockets
R. M. Hall, P. Siney, A. Unsworth, B. M. Wroblewski
720 Mechanobiological adaptation of subchondral bone as a function of joint incongruity and loading
F. Eckstein, C. R. Jacobs, B. R. Merz

729 Structural and material mechanical properties of human vertebral cancellous bone
P. H. F. Nicholson, X. G. Cheng, G. Lowet, S. Boonen, M. W. J. Davie, J. Dequeker, G. Van der Perre
738 Detection of ECG waveforms by neural networks
Z. Dokur, T. Ölmez, E. Yazgan, O. K. Ersoy
742 The ability of quantitative ultrasound to predict the mechanical properties of trabecular bone under different strain rates
S. Han, J. Medige, K. Faran, Z. Feng, I. Ziv

Technical Notes

749 Regression-based indices of fatigue in paraplegics' electrically stimulated quadriceps
E. Rabischong, P. Chavet

755 A battery-powered constant current stimulator for motor end-point detection
M. P. Bolton, J. R. Kulkarni

759 A cell perifusion system of isolated rat islets for studies on rapid insulin-glucose dynamics
N.-K. Yao, S.-H. Tang, L.-W. Chang
